

## TEST CERTIFICATE

### **BLACK DUCK *SEAT COVER***

**TOYOTA HILUX SR5**  
**Seats fitted with side airbags**

**P/N: HX092ABC**

The Black Duck seat cover has been dynamically tested found that it would not adversely affect a performance of the seat fitted side airbag.

Total of two tests were conducted:

1. Test 1633A - Toyota HiLux OE seat cover
2. Test 1633B - Black Duck Toyota HiLux seat cover

Comparison between two high speed films taken during the airbag deployment indicates that the airbags timing is identical and therefore, safety of the vehicle occupants has not been compromised. This verifies that the vehicle seat still maintains compliance to ADR72/00.

Note: It is essential for the performance of the airbag compatible seat covers that critical manufacturing processes ( tread used, stitch length, tension force, etc ) are maintained to strict tolerances!

20th October 2009  
Test 1633A&B
